# Ahmed Ali Alezabi

nasrhamed523@gmail.com | Breda, the Netherlands | Eligible to work in the Netherlands
ahmedalezabi1.github.io | github.com/AhmedAlezabi1

## Professional Summary

Third-year Applied Data Science & AI student at Breda University of Applied Sciences. I like building AI projects that people can actually use: I prepare the data, train the models, put them online with Azure ML and keep them running. I have worked on many projects in computer vision, NLP, robotics and data analysis, often for real clients such as NPEC.

## Education

**BSc Applied Data Science & Artificial Intelligence** | Breda University of Applied Sciences | 09/2024 - Present

- Relevant courses: Machine Learning, Deep Learning, Computer Vision, NLP, MLOps, Robotics, Responsible AI

**High School Diploma** | IMAS, Malaysia | 2016 - 2020

## Training Courses and Certifications

- **Supervised Learning with scikit-learn** | DataCamp
- **Tree-Based Models in Python** | DataCamp
- **Hyperparameter Tuning in Python** | DataCamp
- **Introduction to Deep Learning with Keras** | DataCamp
- **Image Modeling with Keras** | DataCamp
- **Intermediate SQL** | DataCamp
- **Data Warehouse Data Modeling** | DataCamp
- **Excel Power Query & Power Pivot** | LinkedIn Learning
- **UX Foundations: Usability Testing** | LinkedIn Learning
- **Public Speaking Foundations** | LinkedIn Learning

## Projects

**Data & AI Engineer | UGUIDU, AI Museum Guide** | Stedelijk Museum Breda | 09/2026 - Present

- Building the dataset and data pipeline behind an AI guide for museum visitors.
- Will also work on training the AI models.

**MLOps & Deployment Engineer | cv4 Root Segmentation** | NPEC | 2026 | Team of 5

- Built a deployable root-tip detection system with a FastAPI API and dashboard (0.88 F1, 242 automated tests).
- Deployed the model on Azure ML (Kubernetes, GPU) with blue-green releases and autoscaling.
- Added monitoring and alerts, and published the documentation on GitHub Pages.

**Computer Vision & Robotics | Plant Phenotyping** | NPEC | 2025 - 2026 | Individual

- Trained U-Net models for root segmentation and detected root tips with skeleton graph search.
- Built PID and reinforcement learning (PPO) controllers for a lab robot. It inoculated 50 of 50 plants in the final test.

**NLP Engineer | Emotion Classification** | Media-analytics client | 2025 | Team of 3

- Built a pipeline from TV audio to an emotion per sentence, with speech-to-text (3.8% WER) and translation.
- Compared 15+ models and fine-tuned the best one, RoBERTa-Large (0.69 accuracy on 7 emotions).

**Deep Learning Engineer | ScanFresh** | BUas Innovation Square | 2025 | Individual

- Made a 600-image dataset, raised accuracy from 70% to 95% and tested the app with 38 users.

**Data Scientist | Diabetes Hospital Analytics** | 2024 - 2025 | Individual

- Predicted length of stay and medication need for 101,766 patient records with SQL and XGBoost.

## Work Experience

**Logistics Associate (Part-time)** | Crisp, Online Supermarket | 2023 - Present

- Sorted packages and made sure each order went onto the right delivery truck.

**Sorter** | Vinted

- Sorted packages and items for shipping.

**Production Line & Quality Control** | Fruitful

- Checked that each box had the right number of fruits and that the fruit was fresh.

## Skills

**Personal Skills:** Teamwork | Communication | Analytical Thinking | Attention to Detail | Adaptability

**Professional Skills:** Machine & Deep Learning | Computer Vision | NLP & LLMs | Data Engineering | Model Deployment (MLOps) | Data Analysis | Explainable & Responsible AI

**Technical Skills:** Python | SQL | PyTorch | TensorFlow/Keras | Hugging Face | scikit-learn | OpenCV | Azure ML | Docker | MLflow | FastAPI | PostgreSQL | GitHub Actions | Excel

## Languages

Arabic: Native | English | Dutch: B1
